Professional Summary:

Mechanical Engineer

Graduation Year: 2019

I worked on several projects involving infrastructure systems, including drinking water, irrigation, and fire fighting systems. This included the implementation of air valve chambers, washout valves, firemen's valves, fire cabinets, and linking the aforementioned systems to the tank and operating the network. Additionally, I worked on sanitation systems, including manholes, inspection chambers, air release chambers, and agricultural drainage. I was also involved in the design and implementation of internal plumbing systems, covering water supply, drainage, and fire alarm systems.

Key Skills:

- Design and Implementation of Infrastructure Systems:
- Water Networks
- Irrigation Networks
- Fire Fighting Systems
- Sanitary and Sewerage Networks
- Work on Pump Systems and Water Tanks
- Design and Implementation of Internal Plumbing Systems

- Design and Implementation of Fire Alarm Systems
